

Martingale Collar

How to Fit the Collar

- Place the collar around your dog's head and snap the buckle.
- Adjust the fit by pushing the nylon part through the metal slide.
- When tightened with a leash or by holding the smaller loop like a handle, the 2 metal rings should touch directly behind your dog's ears.
- Attach your dog's tags to the rectangle rings on the side, not the D-ring in the center. The smaller loop will lie flat after a few days of wear.

Measuring Your Dog

To pick the right size collar, measure your dog around the top of the neck directly behind the ears. This measurement is the same as the collar when it's fully tightened or closed.

Sizing Chart

Collar Size	Collar Width	Fits Neck Sizes	Sample Breeds
Petite	3/8 inch	5.5-8 inches	Chihuahua, Yorkshire Terrier
